OBJECTIVE

To obtain a Summer 2015 programming internship. To explore different areas of Computer Science, such as A.I., machine learning, computer vision, web dev, visualization, app dev, etc

EDUCATION

Georgia Institute of Technology, Atlanta, GA, USA   August 2014 - May 2018 (expected)
- Candidate for Bachelor of Science in Computer Science

Bernoulli High School, Belo Horizonte, MG, Brazil   February 2012 - December 2013
- GPA: 91.5% - top 20 in a 300 student class
- One of the hardest and most demanding schools in Brazil, ranked #1 High School in the national standardized college admissions exams (ENEM) in 2013.

SKILLS

Programming Languages: C, Python, JavaScript, HTML/CSS, PHP, SQL
External Libraries: ncurses, Pygame, web.py, jQuery
OS Familiarity and preference: Linux > MacOS > Windows
Spoken Languages: English (fluent), Portuguese (fluent / native speaker)
Software: Git, PhotoShop, Audacity/GarageBand/LogicPro, iMovie/FinalCutPro

PROJECTS

Ludum Dare 30   August 2014
- Worked in a team to create a game in under 72h.
- Created the majority of the algorithms facilitating game logic.
- Designed the game's UI and created all visual graphics.
- Designed functions for A.I. integration.
- Playable online - *gtludumdare.github.io/ludum-dare-30/*
- Source - *github.com/GTludumDare/ludum-dare-30*

EnsiColab   June 2014 - Present
- Social network in Python, web.py and MySQL in which Brazilian teachers can post videos of their lectures to receive/provide feedback to eachother.
- Database design, creation and interface for all website functionality over MySQL.
- Designed and built all elements of the UI and of the UX.
- Created the front-end, back-end and all website-user interactions.
  - Including login, signup, logout, settings, post, delete post, comment, rendering feed from followed users, etc.

2048 For Linux   May - June 2014
- Recreated from scratch the web and iOS game in C to be played in the linux terminal.
- replicated the logic of the whole game using only the game itself as a reference.
- Used ncurses library for ASCII graphics, and file I/O for a simple leaderboard database and save file.
- Available as ppa - ppa:raphaelgontijolopes/2048linux
- Source - *github.com/iRapha/2048linux*

Buzz Bot (our version of Hubot)   July - August 2014
- Collaborated with with other GATech CS students to develop multiple JavaScript scripts to be run by a Hubot on an online chat group for the Georgia Tech Class of 2018. It responded to commands such as "buzz image <query>" or "buzz /r/dataisbeautiful"
- Integrated various website APIs for the bot to use, such as reddit and soundcloud.
- Source - *github.com/mobyvb/slack-buzz*

LEADERSHIP/ACTIVITIES

Model UN   2011, 2012, 2013
- Participated in over 3 model UNs, including some in a foreign language (english).

Academic Olympiads   2010 - 2013
- Brazilian Olympiad of Astronomy and Astrophysics - Bronze and Gold Medal
- Brazilian Olympiads of Physics - Honorable Mention and Gold Medal

Filmmaking, Group Leader/Editor/Director   February - December 2012
- Directed and edited over 7 short films with a various student groups throughout the year.

Active Astronomy, Member   2011
- Studied astronomy and practices astronomic photography in a space observatory.

OTHER

- YoYo-ing, Painting/Drawing, Reading, Video games, TV Shows (Community, Parks&Rec, HIMYM, 30 Rock).
